

THE BLOCKAGE DOCTOR

Commercial Solutions

Australia

Prepared by Tim Leggott

AN OVERVIEW

We provide cost effective, time sensitive trenchless Solutions & alternatives to costly excavations and replacement methods for pipes, chutes, drains, man holes & culverts.

The Blockage Doctor Provides internal relining Solutions to Tier 1 & 2 builders, water authorities, engineers and councils throughout Australia.

THE BLOCKAGE DOCTOR COMMERCIAL MANAGEMENT TEAM

Tim Leggott - Director

Ben Leggott - Director

Rhys Stirling - Project Manager

WHAT WE DO

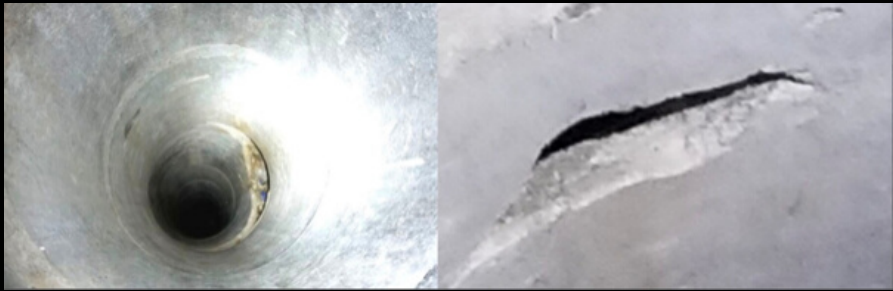

Small and Large bore pipe relining
Main Line rehabilitation
Diameters 40mm - 2400mm
Air or water inversion relining
High temp, High Impact Solutions
U.V GRP Relining
Junctions, Laterals and Jump ups
Fibreglass Patch CIPP
Robotic Cutting

The Blockage Doctor

450mm diameter RCP reline

HIGH WEAR EPOXY RESIN FOR CHUTES

Before

After

We use a Resin specifically designed for high wear and high impact situations. The product was originally commissioned to resolve cracks in a vertical refuse chute for a Hong Kong high rise building in late October 2017. The resin was produced to flex and absorb the energy of objects hitting it. In comparison with standard epoxy resins, this High Wear / High Impact resin has:

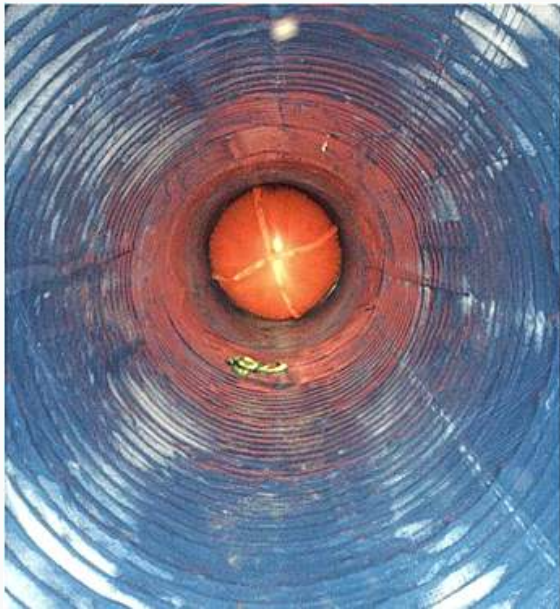

- Five times the strain to maximum load. After maximum load, it continues to flex without breaking.
- About one quarter of the flexural strength.
- About 10% of the flexural modulus - a measure of the stiffness of the resin.

The Blockage Doctor

junctions, laterals, jump-ups

LARGE BORE RELINING

1800mm Large Bore Reline
underneath a Road Bridge

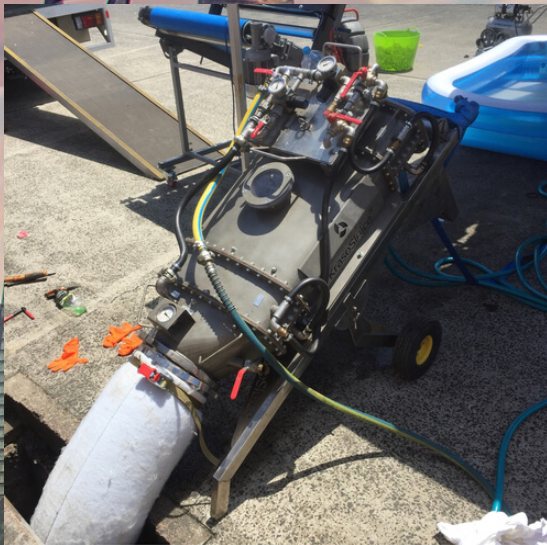

The Blockage Doctor

Large Bore

300, 450 & 600MM LARGE BORE

The Blockage Doctor

THE
BLOCKAGE
DOCTOR

Large Bore

SMALL BORE, DOMESTIC AND HOUSE CONNECTION BRANCHES

40mm-225mm Small Bore Relining

The Blockage Doctor

Small Bore

BOX CULVERTS

The Blockage Doctor

Box Culverts

THE BLOCKAGE DOCTOR FOOTPRINT
